

If you want happy, productive employees, let's make it easier to get to work.

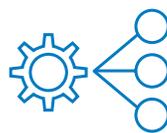

The WageWorks Commuter Program

Give your employees the best benefits, and they'll give you their best effort. Our Commuter Program is one more WageWorks way to do it—giving you the best program at the best price, without adding administrative burden.

How can we be so confident? We own the platform on which the solution is delivered—and that's a lot like owning the road—giving us the versatility to:

Maintain relationships with hundreds of transit authorities and thousands of parking locations

Take the hassle out of administration by offering a flexible, efficient, easy-to-use and easy-to-manage solution

Make things easy for commuters by giving them a variety of payment options, plus a simple mobile app and online portal to manage their account

Making the daily commute less of a job.

As the largest transit purchaser in the country, we can pick up and park your people in more places than anyone. More trains, more buses, more ferries, more parking spots and more options like uberPOOL, Lyft Line and Via.

Plus, more ways to pay—including a transit smart card option that auto-loads commuter contributions and keeps people moving through the turnstile. We can even purchase transit passes and send them straight to your employees' homes.

It's simple for them, so it's simpler for you.

It's like finding a parking spot right next to the door.

Parking doesn't have to be a pain. With connections to more than 5,500 garages, lots and valets; a geo-mapping service to find spots near your office; and a way to waitlist lots where demand exceeds supply, WageWorks takes the pressure off this everyday problem.

There's even a way to reserve parking spots in advance. And when you're late for a meeting, that's nothing short of miraculous.

Unclogging traffic jams, right there in your office.

WageWorks wants your program to be as simple as possible, simply because you have better things to do. That's why:

- Our programs are customized to each of your corporate locations
- We support corporate, regional and employee-level subsidies
- Commuters have a direct line to customer service, you don't have to deal with the day-to-day
- Everything integrates with payroll management, tax compliance and employee enrollment functions

And you can be sure it all complies with the latest IRS regulations.

Your employees are going places. We go with them.

If it isn't mobile, you can't really call it a commuter program. So our easy-to-use app goes wherever they do, allowing your people to:

- Submit claims and view claims status
- Check account balances
- View recent card transactions
- Learn more about the program

Are your solutions causing problems?

If you have one vendor for your commuter program, another for your HSA program and still others for the rest of your various benefits, you have more solutions than you need. When you work with WageWorks, all your consumer-directed benefits fall under one program. One thing to manage. One number to call. It's a simple, connected experience for employees and an integrated, easy-to-manage solution for you.
